Press release *Sainte-Marie, 2 September 2021, 10am*

Launch of a 29-plot housing development in Marie-Caze, in the north-west of Reunion Island, near the beaches

- **Continuing success of high-end housing developments**
- **Premium location and outstanding views**

After the commercial success of the 116 housing plots sold in the Marie-Caze neighbourhood of Saint-Paul since 2016, CBo Territoria announces the launch of Tipolka 2, a 29-plot housing development to build over 1,1 hectare.

Offering surface areas from 270 m^2 to 550 m^2, the wide range of serviced and ready-to-build plots of the new development will allow future buyers to carry out their personalised construction project according to their objectives and budget.

Each plot offers complete services with boundary low wall, fence on the street side, technical low wall and junction box for water, electricity, telecom as well as connection box for the sewer at the boundary of the plot.

Overlooking the bay of Saint-Paul and the Indian Ocean, Marie-Caze is ideally located between Savanna and La Plaine Saint-Paul. The site has many advantages: high school, local shops, shopping center, cinema and hospital nearby as well as the protected nature reserve of the pond of Saint-Paul (l'Etang de Saint-Paul).

Finally, the residential area is a stone's throw from Saint-Gilles, the famous seaside resort of Reunion Island, with its magnificent beaches and lagoon.

This offer will be followed, until 2024, by the launch of 3 new housing developments covering nearly 100 building plots.
